- SSLC - 2020
- Percentage - 82%

## SKILLS

**Programming Languages:**

- Java
- JavaScript
- C

**Web Technologies:**

- HTML
- CSS

**Frameworks & Libraries:**

- Spring Boot
- ReactJS
- Bootstrap

**Databases:**

- MySQL
- PostgreSQL

**Tools:**

- Git
- GitHub
- Postman
- Swagger

## CARRIER OBJECTIVE

Passionate Java Full Stack Developer with a strong foundation in frontend, backend, and database technologies. Seeking an entry-level role to build scalable applications while continuously learning and contributing to organizational success.

## PROJECTS

**AI Exam Platform**

- Developed a full-stack Java project in which user submits exam inputs, it calls the Gemini API to generate questions as structured JSON. Users can take the test, then view their test history and AI-generated feedback on each result. Admins can view and manage all user details.
- https://ai-exam-platform-gl4d.onrender.com

**AI Diabetes Prediction Platform**

- Developed a full-stack Java project in which patients enter medical data or upload reports, and the Gemini API returns a diabetes risk assessment with diet and exercises. Patients can view history, track trends through charts, and chat with an AI health coach. The admins can manage users and view audit logs.
- https://ai-diabetes-prediction-yir6.onrender.com

**Hospital Management System**

- Built a full-stack Hospital Management System for managing patients, doctors and appointments, through a secure, responsive web application.
- https://hospital-management-two-phi.vercel.app

**AI-Based Traffic Management**

- Designed a smart traffic management system using AI to reduce road congestion.
